

Poise Lamp

The Poise Lamp is crafted from a single piece of wood. The playful and versatile design makes it suitable as a floor as well as a task lamp, and lends a different expression in every position. Available in either a brass or an anodised aluminium disc base and knob, with either a walnut or a beech wood shaft, the lamp is available in two sizes. The strong vertical form allows the illumination piece to freely slide up and down, and move its face upwards and downwards for the light to be focused in any desired direction. The warm, ambient lighting complements its harmonious design.

Saif Faisal Design Workshop

About the Firm

The Saif Faisal Design Workshop draws inspiration from various mediums – a social concern, a beautiful material, an inspiring craft, a practical need, or even just a curiosity. With a hands-on approach to its work, the team focuses on sustainable aesthetics and longevity when designing projects covering architecture, interiors, product design, motorcycle design, automotive racing, furniture, lighting, and craft and jewellery. The studio was set up in Bengaluru in 2014 by Saif Faisal, a trained architect and an avid motorcycle and racing enthusiast.
